

Guelph Family Health Team

INR Clinic

For anticoagulation management

Dear (insert patient's name)

As you may know, your doctor is now part of the Guelph Family Health Team. Your doctor works closely with you and with other members of the team to provide you with the care you need. At this time, **your doctor would like to invite you to participate in the new Clinic for management of your warfarin (Coumadin) therapy.**

The clinic is located within the medical office at 21 Yarmouth St, Guelph and will be opening its doors on January 7th 2008.

This clinic will allow you to have your blood work completed with a simple finger stick rather than having your blood drawn by the lab. The results of your test will be available within minutes.

The certified team members, Cathy Brown (pharmacist) and Sharon Brenner (registered nurse), will be able to make any adjustments to your medication before you leave the clinic. Waiting for telephone calls will be a thing of the past.

Your medical record will be updated before you leave the clinic, which means that your physician will have the most up-to-date information at all times.

(Insert physician name), Cathy and Sharon would be happy to discuss any questions that you may have. Please call either Cathy or Sharon at (519) 837-4444 to book your first half hour appointment.

The following information sheet describes the Clinic in further detail.

Sincerely,

_____ (Physician's Name)

_____ Cathy Brown (Pharmacist)

_____ Sharon Brenner (Registered Nurse)
